Norwegian playwright and author Jon Fosse has just been awarded the 2023 Nobel Prize in Literature for his “innovative plays and prose which give voice to the unsayable”.

The Swedish Academy credits Fosse as “one of the most widely performed playwrights in the world”, although the 64-year-old originally made his name as a novelist, beginning with *Red, Black* in 1983. He has since written many works of

prose and poetry. “His literary works, spanning a variety of genres, comprises about 40 plays and a wealth of novels, poetry collections, essays, children’s books and translations,” said Anders Olsson, chairman of the Nobel Committee for Literature.

Jon Fosse draws inspiration from his rural living environment and personal struggles, which have deeply influenced his distinctive writing style. Growing up in a small coastal village, Fosse was immersed in the beauty of nature and the vastness of the sea, which filled him with a sense of solitude and introspection(内省) that is reflected in his works. Fosse’s writing discussed themes of loneliness, longing, and the search for meaning in life. Additionally, his battles with depression have enabled him to explore the depths of human emotions and existential despair.

“He touches you so deeply when you read his works,” said Anders Olsson. “What is special about him is the closeness in his writing. It touches your deepest feelings — anxieties, insecurities, questions of life and death, which are things that every human being actually faces from the very beginning. In that sense I think he reaches very far and there is a sort of a universal impact of everything that he writes — it has appeal to this basic humanity.”

Fosse is the first-ever laureate writing in Nynorsk(尼诺斯克语), one of the two official languages of Norwegian, but only used by just 10% of the population. As the Guardian writes, “Many Nynorsk speakers see Fosse ‘as a kind of national hero’ for his championing of the language.” Fosse’s recognition on a global stage promotes the visibility and importance of Nynorsk as a written standard. It will attract more attention to Nynorsk literature, inspire and encourage Nynorsk speakers to continue preserving and promoting their linguistic heritage.

24. What do we know about Jon Fosse from paragraph 2?

- A. His most popular work is the play *Red, Black*.
- B. He accomplished various genres of literature works.
- C. Many famous plays are the inspiration for his writing.
- D. His language skills earned him the Nobel Prize in Literature.

25. What does paragraph 3 mainly talk about?

- A. Jon Fosse’s tough experiences.
- B. Jon Fosse’s motivation for writing.
- C. The major themes of Jon Fosse’s works.
- D. The effect of life on Jon Fosse’s writing style.

26. What is special about Jon Fosse’s works according to Anders Olsson?

- A. They explore the real meaning of life.
- B. They touch humans’ deepest emotions.
- C. They show the bond between humans and nature.
- D. They appeal to readers to reflect on personal feelings.

27. What contribution of Jon Fosse is mentioned in the last paragraph?

- A. He explains the importance of linguistic diversity.
- B. He has improved the international status of Norway.
- C. He boosts the development and preservation of Nynorsk.
- D. He shapes the basic writing standard of Norwegian literature.

C

The needs of plus-size consumers have long been the elephant in the room of the fashion industry until body positivity and fat acceptance movements promoted the slogan that large-bodied people are not those who are left behind. This size-inclusive trend has become so popular that it is influencing mainstream culture. As a result, fashion brands have finally decided to extend their size ranges. In 2022, the plus-size market grew twice as fast as the standard size market in both North America and the UK.

Yet, many consumers say fashion brands broadening their ranges are not truly inclusive. “Inclusive sizing means that all bodies are included in fashion, not just the ones who fit in standard sizes,” says Marie Southard Ospina, a UK-based

Trump and Kim Kardashian rather than Mahatma Gandhi and Mother Teresa. There's no way that Gandhi and Mother Teresa could have achieved what they did without confidence in their strengths, and yet they are both pillars of modesty and selflessness.

When we assume that strength-focus is the same as a self-focus, we fail to entertain the idea that people who know their strengths are, actually, more likely to be pro-social and focus on helping others.

It's tempting to conclude that every young person is at risk of becoming a narcissist but I'd like to stand up for the thousands of young kids I have worked with who are caring, thoughtful and humble—even when they use their strengths.

32. Which does the underlined word “coherent” possibly mean?

- A. Reasonable. B. Primary. C. Complicated. D. Beneficial.

33. Why teenagers' strengths are often mistaken for narcissism?

- A. Teenagers with strengths are always arrogant, selfish and uncaring.
B. The public are more exposed to research on narcissism.
C. There is a lack of strengths in our collective consciousness.
D. Numbers of people are diagnosed with narcissism by doctors.

34. The author mentions Gandhi and Teresa in paragraph 6 to show that _____.

- A. they are both victims of binary thinking B. public figures unknowingly fall prey to narcissism
C. confidence is quite important for celebrities D. one can be both modest and sure of himself

35. What's the author's attitude towards young kids' strength-based approaches?

- A. Skeptical. B. Neutral. C. Favorable. D. Cautious.

第二节 (共 5 小题; 每小题 2 分, 满分 10 分)

根据短文内容, 从短文后的选项中选出能填入空白处的最佳选项。选项中有两项为多余选项。

Many of us set goals, but sometimes we fail to achieve them. There are many causes why we don't manage to realize our goals. 36 There is a way, though, to help address this problem: set reminders. People employ a psychological strategy called cognitive offloading, where we use a physical action to reduce demands on our brain. Specifically, we may outsource our intentions from being stored in our brains to reminders outside our head. 37

Understanding the benefits of cognitive offloading can improve our ability to remember and follow through with our intentions. The biggest benefit is simply that it improves memory performance. It increases the probability that we will work towards the goals we need to reach. 38 “The more we offload unimportant information, such as items on a shopping list, the more we can use our brain for those more significant cognitive tasks, such as creativity,” said Sam Gilbert, professor at the University College London.

39 Still, there are potential negative parts for it. We are more likely to forget what we offloaded if we no longer access our storage, such as when our smartphone dies. We also tend to offload the important things we most want to remember. In a surprise test where their reminders were wiped clean, the participants were more likely to forget the important items and recall the unimportant ones, that is, the more important the intention we want to remember, the more likely we are to offload it—and to forget it.

We'd better tend to create reminders when we think we need them, but not necessarily when we do need them. 40 “If our understanding of our memory ability is wrong, this suggests that we will either overuse or underuse reminders,” Gilbert said. “We can learn by noticing the times that we have forgotten to do something and could have used reminders to help.”

A. Cognitive offloading has noticeable benefits.

- B. One common reason is that we simply forget them.
 C. Besides, it can free up our limited cognitive resources.
 D. A good example can be documents on our smartphone calendars.
 E. The process of cognitive offloading helps us identify false information.
 F. Our beliefs about how good our memory is directly influence whether we set them.
 G. Other experts say it's too soon to understand how cognitive offloading affects our brains.

Shining Valley was a remote village isolated from the outside world. Believe it or not, there was a 41 custom for centuries that all aged people would be taken to the mountain Obatsuyama and 42 to themselves. When the very day came, the 43, with deep and 44 sighs, would prepare whatever needed for the agreed-upon way of death at that place.

A poor farmer and his aged, widowed mother lived at the foot of the mountain. He loved his mother with reverence, his heart filled with sorrow. At 45, the farmer lifted his mother to his back and started on his 46 journey. Narrow and steep, the road was crossed and re-crossed by paths. In some place, they were lost and confused. On he went, climbing 47 upward.

The eyes of the old mother were not 48 even in the dark, her loving heart growing 49. How could her son return home safe not knowing the right paths? 50, she accurately reached the twigs(细枝) from brushes along the paths, broke them, and quietly 51 a handful every few steps of the way. The path behind them was then 52 with tiny piles of twigs. Finally, they reached the 53. The youth gently released his burden and silently prepared a place of comfort as his last duty to the loved one. 54 fallen pine needles, he made a soft cushion and 55 his old mother onto it. With tearful eyes and an aching heart he said farewell.

The old mother told her son in a 56 voice. "My son, the mountain road is full of dangers. Follow the path that holds the piles of twigs. They will guide you to the same path farther 57".

His heart broke within and 58 to the ground, he cried aloud, "Oh, honorable mother, I will not leave you. Together we will follow the path of twigs, and together we will 59!"

Not knowing what was in store for him, he shouldered his 60 once more (how light it seemed now) and headed home in the moonlight.
